If parents have no better sense than to furnish their children with toy pistols, dynamite canes, cannon crackers and other death-dealing inventions, THE LEDGER respectfully asks Mayor STALLCUP and the Police to step in and stop it.

A DISPATCH from New York says VAUGHN completed the thousand miles in 23 hours, 33 minutes and 20 seconds, and at the end of the twenty-fourth hour had covered 1,015½ miles. The dispatch fails to disclose the reason for VAUGHN's hurry; but if he is a delinquent subscriber running away from the Office Collector, I know one or two fellows in Maysville who can beat him several blocks.

STRIKES come high to the taxpayers, but the Walking Delegates must have them. The City of New York has just paid a bill of \$9,000 for meals served to policemen who were on extra duty during the subway strike. The subway company offered to pay the bill, but Commissioner McADOO declined the offer, taking the ground that the police were on proper duty for the city, preserving order.

THE making of black black ink seems to be one of the lost arts. Nearly every dealer will sell you what he calls black ink—but when pressed he'll confess that it's a sickly pale blue, but will turn black in a few months. Now I have known a near-sighted compositor on a daily paper to lose his job while waiting for this pale blue ink to turn black, that he might be able to see and read the Hoss Editor's copy.

FIGURATIVELY speaking, Philadelphia is not only "splitting things wide open" on shore, but a few days ago the American liner of that name cut a whale in two at sea.

WHEN the Judicial Convention met in this city, the Hon. ROLLA K. HART howled himself hoarse, and then bolted the Convention, because Chairman JIM ROBERSON did not recognize the Fleming delegation that had the certificate of the County Chairman. When the Legislative Convention met the other day in Flemingsburg, ROLLA bolted that Convention because Chairman PUMPHREY did recognize the delegations that had the certificates of the President Chairman. Isn't friend ROLLA's consistency a little wool-gathered?

THE most prominent and influential business men of Cincinnati are paying their respects to the piratical Post, which inspired and has reprinted one LINCOLN STEFFENS's slanderous article in McClure's Magazine, saying that "Cincinnati is the worst governed city in the United States." I quote a single statement from hundreds along the same line, that of Mr. HARRY WOODS of the Chatfield & Woods Company—

"I would not recommend that Cincinnati newspapers publish such slanders about their city as The Post has; but in this instance I do not think any harm was done, because nobody believes The Post anyway. It makes no difference what that paper says. No credence is put in its statements."

I do not believe in the un-American boycott system; but it really does look like a paper that will deliberately slander its own town doesn't deserve the support of its citizens, especially its business men.

The Portland Oregonian wants to know "What are brains for?" Possibly for the working out of the problem of the sudden change of the Pacific coast from Chinese exclusionists to anti-exclusionists.

THE SECRET OF SUCCESS

"No, Sir! You cannot palm off any substitutes on me. I've been using August Flower since I was a boy, and I'll have no other."
Forty million bottles of August Flower sold in the United States alone since its introduction! And the demand for it is still growing! Isn't that a fine showing of success? Don't it prove that August Flower has had unfailing success in the cure of indigestion and dyspepsia—the worst enemies of health and happiness? Does it not afford the best evidence that August Flower is a sure specific for all stomach and intestinal disorders?—that it is the best of all liver regulators? August Flower has a matchless record of over 35 years in curing the ailing millions of these distressing complaints. All sizes, 25c and 75c. All druggists.

WORMS

"I had for years suffered from what medical men called dyspepsia and Catarrh of the Stomach. In August I purchased a box of Cascarets and was surprised to find that I had, 'yes—a wiggling, squirming mass left me. Judge our doctor's surprise when I showed him thirty feet and in another day the remainder of the same length of a tape-worm that had been sapping my vitality for years. I have enjoyed the best of health ever since. I trust this testimonial will appeal to other sufferers."

STATE COLLEGE of Kentucky, Lexington, Ky.

The Agricultural and Mechanical (State College) of Kentucky offers the following courses of study, viz: Agricultural, Horticultural, Chemical, Biological, Mathematical, Physical, Normal, School, Classical, Mechanical Engineering, Electrical Engineering, Civil Engineering and Mining Engineering, each of which extends over four years and leads to a degree. Post-graduate studies are also provided, leading to a master's degree. Each course of study is organized under a separate faculty. The general faculty numbers nearly fifty Professors and instructors. County appointments receive free tuition, room rent in dormitories, fuel and light, and if they remain ten months traveling expenses.
The laboratories and museums are large, well equipped, comprehensive and modern.
The Legislature appropriated \$60,000 for a college home for young women and \$50,000 for drill hall and gymnasium for men. Both buildings are completed and in use. Military tactics and science are fully provided for as required by Congress.
Graduates from the several courses of study readily find excellent positions and liberal remuneration. The demand is largely in excess of the ability of the College to supply.
Specialists with the necessary number of assistants have charge of each department of natural science, engineering, instruction in science and in art.
The State College of Kentucky, though bearing hitherto the title of "college," is the only institution in the Commonwealth doing, in any proper sense, university work.
The completion of the College Home for Young Women provides facilities for good board and lodging. It is equipped with all modern conveniences, including bathrooms and rooms for physical culture. It is heated by steam and lighted by electricity.
An opportunity is thus afforded to young women of obtaining a thorough education in classics, modern language, literature, science, mathematics, logic, metaphysics, history and political economy.
No other institution in the state offers advantages for education of women at all comparable to those offered by the State College of Kentucky.
For catalogue, method of obtaining appointments, information regarding courses of study and terms of admission, apply to

New Postoffice Notes.

The new flagpole, now ready, is a beauty. It is 25 feet in length.

Lathing is now in progress. Plastering will be commenced next week.

Invoices of furniture have been received, showing a total cost of about \$2,000. Two new safes, as ordered, will cost \$750.

It will probably take all of July to complete the plastering, three weeks in August to set the interior finish in position, then three weeks to install the hardware and complete the painting.

The Contractors and the Superintendent of Construction expect the building to be completed and ready for occupancy on or before the 1st of October. It is possible but not probable that the building will be completed on September 15th, 1905.

Found a Cure For Dyspepsia.

Mrs. S. Lindsey of Fort William, Ontario, Canada, who has suffered quite a number of years from dyspepsia and great pains in the stomach, was advised by her druggist to take Chamberlain's Stomach and Liver Tablets. She did so and says: "I find that they have done me a great deal of good. I have never had any suffering since I began using them." If troubled with dyspepsia or indigestion why not take these Tablets, get well and stay well! For sale by all Druggists.

There's considerable complaint among farmers of rust in the wheat.
